

Almaviva

absolute digital.

Local Public Transport

Innovation driving the Country ahead

A technological framework of solutions supporting the mobility value chain

Innovation driving the **Country** ahead

Our value proposition

End-to-End Services

Implementation of ad-hoc solutions supporting step-by-step customer needs (from solution design to operation)

Solution framework

Solid process knowledge, technology, information & methodology skills applied to innovative, modular, customizable, integrated and intermodal solutions

As-a-Service

Customized services based on our innovative solution framework for ITS and infomobility platforms, available on an as-a-service basis

people mobility steps ahead

Mobility is undergoing strategic regulatory changes driving new models to dramatically cut down on management costs and deliver improved ITS and transport services to the Community in a competition-free market.

ICT leading market changes

ICT nowadays plays a strategic role in the new challenges of the Transportation Industry: ICT solutions to achieve intermodality strategies, crunching on time-to-market, optimizing integration and fleet & crew management, and develop an efficient transport network and enhanced ITS platforms perceivable by users and measurable by quality systems.

Almaviva has gained a unique industry-specific expertise delivering innovative solutions to the major transport operators to support new integration models and business efficiency needs.

Almaviva Transportation & Logistics BU

in Almaviva Transportation & Logistics BU nowadays represents the most significant ICT player within the Transportation & Logistics Industry. From exclusive expertise in the railway transport sector to the definition of a complete value proposition of solutions and services addressing the integrated local public transport and intermodal logistics sectors.

Almaviva Transportation & Logistics BU designs and implements mission-critical enterprise solutions to passenger and freight mobility: a suite of integrated solutions for business process and resource planning, operations management, traffic command & control supervision, information management, e-ticketing, ERP, security, and mobile technologies.

GOVERNANCE

Solutions for the implementation of integrated mobility plan strategies, E2E management of general outline agreements, tenders, and service contracts

SECURITY

Risk Assessment & Security Management solutions

CUSTOMER

Solutions for customer engagement management, passenger information & support management (context-aware and passenger-need based), intermodal travel planning & customer experience management

SALES

Solutions for integrated intermodal transportation offer & ticketing: centralized service platform, clearing house, C & C-less technologies, multi-channel purchase & credit recharge

OPERATIONS

Solutions for operation schedule and management: integrated transportation planning, fleet & crew management, control room traffic management, network and in-plant operation monitoring

ASSETS

Solutions for vehicle and plant maintenance, logistics and material purchase, supplier, catalogue and incident management

ON BOARD

Solutions & services for an exhaustive management of means and rolling stock material on-board device requirements: on-board ICT network, passenger information on routes and stops, infotainment, ticketing fare adjustment, passenger service attendance, on-board surveillance, and system integration (with centralized control room on information collection & broadcast) for operation schedule and management

ON FIELD

Land services & solutions (accessible at stations and stops): on-field technological infrastructures, customer information, ticketing services (sales & validation), station equipment remote diagnostics, video-surveillance

the group

AlmavivA means technology innovation. Solid skills, unique expertise, continuous improvement and deep knowledge on the different industries, public and private sectors, make of AlmavivA the Italian leading Group within Information & Communication Technology.

AlmavivA supports the Country digital growth processes and takes up the challenge that each company must face to remain competitive, by innovating its own business model, organization, company culture and ICT system.
