

The Almaviva logo features the word "Almaviva" in a white, sans-serif font. The letter "A" is stylized with a white waveform icon integrated into its left vertical stroke. The background of the entire page is a dark blue gradient with a network of glowing orange and white nodes connected by thin lines, suggesting a digital or data network.

THE GROUP

Almaviva means technology innovation. Solid skills, unique expertise, continuous improvement and deep knowledge on the different industries, public and private sectors, make of Almaviva the Italian leading Group within Information & Communication Technology. Our mission: to support the Country digital growth processes and take up the challenge that each company must face to remain competitive in the Absolute Digital era, by innovating business model, organization, company culture and ICT system.

THE GROWTH OF CYBER SPACE

The fourth Industrial Revolution has been characterized by physical and digital production system integration and has impacted on the creation of more and more complex connections. Widely-spread cyber threats and highly-sophisticated techniques compromise and expose enterprises to the risk of cyber attacks. Today's target is not only to fight against violations and react to attacks, but also to know and prevent potential threats.

INDUSTRIES EXPOSED TO CYBER ATTACKS

Cyber Intelligence provides with a higher and higher level of knowledge and understanding of cyber threats.

This is how organizations can set up actionable cyber security strategies and achieve an effective financial gain.

ALMAVIVA CYBER SECURITY PRACTICE

Cyber Intelligence to know and prevent potential threats

A modular and scalable approach, 4 domains: a comprehensive and diversified panel of services, proprietary & market-leading technologies and products addressing more and more sophisticated cyber threats and constantly evolving industry business needs

SECURITY CONSULTING & ADVISORY

Industry-specific advisory services supporting enterprises and organizations in the definition and implementation of a well-defined cyber risk framework: Governance, Risk & Compliance, Software & Hardware Security Assessment (Vulnerability, Penetration, Code Review, Firmware Security, Cyber Training)

SYSTEM INTEGRATION

Integration systems in the different steps of requirement definition, design and implementation, by using innovative market-leading technologies and proprietary solutions: ICS Monitoring, Serverless & DevOps Cloud Sec, Data Masking, Web & E-mail Security-as-a-Service, Web Isolation Secure Browsing, Hybrid DC Sec, Mobile Sec, Privileged Access Management, Borderless Sec CASB, Sandbox, Fixed Function Security, Passive Security Assessment, Fraud Detection

HOMELAND SECURITY

Cyber Defence solutions, Command & Control systems, secure communications, tactical radars, biometric identification technologies, investigations supporting and crime prevention systems

PRODUCTS & SOLUTIONS

Customizable proprietary solutions aiming to define monitoring activities on most sensitive enterprise assets, ensure the reduction of business risks, enabling growth and operations, and optimizing costs: proprietary platforms to normalize data management-driven processes according to ruling regulations, enterprise account and system access authorization management, to improve the overall security level of organization through the measurement of cyber risks and the definition of custom paths of prevention and mitigation

RESEARCH & DEVELOPMENT

Specialized CyberLab addressing CyberSec platform enhancement, new solution prototyping and benchmarking, by implementing best-of-breed tools and methodologies: ICS 3D Simulation, Deep Learning Penetration Testing, Cyber Deception, SOC Automation
